## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Amendment***

1. This action is in response to the communication filed on May 21, 2004.
2. Claims 11-27 are pending in this action. Claims 1-10 have been canceled.

Claims 11-27 have been newly added.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 11-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 6 of U.S. Patent No. 6,151,573. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant applicant claims 11-14 and 21 merely broadens the scope of claims 1 and 6 of the patent 6,151,573 by eliminating some limitations.

It has been held that the omission of an element and its function is an obvious expedient if the remaining elements perform the same function as before. *In re Karlson*,

Art Unit: 2654

136 USPQ 184 (CCPA). Also note Ex parte Rainu, 168 USPQ 375 (Bd. App. 1969) ; the omission of a reference element whose function is not needed would be obvious to one skilled in the art.

The claimed language of claims 11-27 merely broadens the claimed subject matter of claims 1 and 6 of the patent 6,151,573.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Woodland et al. (Iterative unsupervised adaptation using maximum likelihood linear regression).

As per claim 11, Woodland teaches, “a method of source normalization for modeling of speech comprising the steps of:”

“providing an initial speech recognition model and performing a set of transformations on said initial speech recognition model or following new speech recognition models to reduce the recognition error rate by determining new speech recognition models and determining new transformation jointly with the new speech recognition models” (see section 1. Introduction).

As per claim 12, Woodland teaches, "wherein said set of transformations includes an application of an estimation maximization algorithm" (Abstract).

As per claim 13, it is interpreted and thus rejected for the same reasons set forth in the rejection of claim 12.
